Established in the 1950s Ward Recycling has over 60 years experience and has long recognised the importance of waste management and its positive impact on the environment. We are proactive in our approach towards improving our sites and equipment so that we can continue to have an active role in environmental preservation and improvement.

Our specialist waste management systems operate across two sites ideally located in the heart of the country. Both our Ilkeston and Swadlincote sites are based in Derbyshire and offer a comprehensive range of recycling and waste management facilities and are maintained to the highest of standards.

Ferrous Metal Recycling

Ward Recycling are among the UK's largest independent metal recyclers, processing in excess of 5000 tonnes per week. We have an extensive range of processing machinery, including high volume shredding, large scale shears and balers. As specialist buyers of works arising materials, we buy all grades of ferrous and non ferrous metal. Ward Recycling offer the most competitive prices, excellent service, an extensive range of collection services.

Waste Management

Whatever your waste management requirements are, Ward Recycling can deliver the solutions to help you exceed your recycling targets and increase profitability. We specialise in waste management contract work across a broad spectrum of business and industry. Practical solutions that meet environmental legislation are paramount and we achieve this in the most cost effective way.

Skip Hire

We offer skip hire services for business and home use. All sizes of containers are available from midi skips and builders skips to larger skips that can be enclosed if required. Larger Roll on/off containers are also available from 20cu.yrd to 40 cu.yrd. Ward Recycling provide total business solutions for a variety of industries to suit all commercial applications and can advise you on any legal requirements regarding on-road siting.

Recycling

Ward Recycling are among the UK's largest independent recyclers and we can recycle almost any material from general waste to hazardous substances including, Ferrous Metals, Non Ferrous Metals and general Waste - Redox. Using the latest technology and processes we pride ourselves on our recycling abilities and production.

Vehicle Disposal

Following the introduction of the European Union Vehicle De-Pollution directive on the 16th July 2004, vehicles offered for destruction must be handled in an environmentally sensitive manner. Ward Recycling are a registered Vehicle De-Pollution Centre and have developed a 10 step process for the correct disposal of your vehicles to ensure that you comply with your responsibility with both environmental and vehicle legislation.

Recycled Raw Materials

We produce over 30,000 tonnes of material each month and are a major supplier of raw materials to a wide variety of industries both in the UK and worldwide. Ferrous and non ferrous scrap is delivered to steelworks and foundries either in the UK or exported to countries such as China, Spain, Turkey and the USA. Recycled waste products are supplied to the construction, paper, wood and roadbuilding / landscaping sectors.
