

Trusted with Hazardous Waste

Recycling & Management

Ward's hazardous waste management service offers up-to-date advice on legislation and provides guidance on the best solutions for dealing with hazardous waste.

From handling, storing, transporting and recycling hazardous waste, Ward can provide you with the most efficient, cost effective and safest way to dispose of your hazardous materials.

We work closely with the Environment Agency, developing practical solutions to help businesses manage the safe disposal of hazardous waste of all types and offer a range of collection services to accommodate your needs.

If you are not sure if your waste is hazardous call one of our waste specialists and we can offer professional advice and an assessment of your materials over the phone.

It's never worth guessing with hazardous materials and your personal and environmental safety should always come first.

Ward is committed to being at the forefront of hazardous material recycling in the UK.

All types of battery

Fluorescent lighting

Chemicals, oils & solvents

Asbestos

Hazardous Waste Recycling & Management

Hazardous waste

Ward is fully licensed to transport, handle and dispose of a wide variety of hazardous materials, also known as "hazmat". We oversee and complete all of the necessary legal paperwork showing all of the collection and disposal points for your hazardous material, which is also fully auditable for environmental reporting.

We are highly qualified and experienced in handling materials such as asbestos, solvents, oils, pesticides, paints and varnishes, equipment containing ozone depleting substances e.g. fridges, batteries and chemicals like brake fluid, aerosols and fluorescent lighting tubes.

Why choose 'hazmat' recycling?

- Safe disposal of your hazardous waste by licensed professionals
- Peace of mind that Ward has every aspect managed and can provide a full cradle to grave audit trail
- Fully accredited service - Ward holds ISO9001 quality and ISO14001 environmental management accreditation

- Receive a bespoke handling service that is fully tailored to your needs

Hazmat recycling - safe, secure and required by law.

Hazardous material recycling is essential for ensuring a safe environment for everyone. Safe disposal of hazardous waste ensures that the environment is kept free from dangerous materials that can cause skin or eye irritation, other serious medical issues and in worst cases can be fatal. It also protects the environment from destruction, damage and contamination.

We take this part of our work extremely seriously and aim to provide the very highest levels of service and scrutiny available.

Know your UK hazard symbols

If your waste materials carry any of these symbols you need to legally dispose of them in a way that adheres to hazardous waste disposal legislation:

If you're in doubt - call us today.
